

RISK ASSESSMENT AWARENESS COURSE

At SHEilds, we understand how important Risk Assessments are. Risk Assessments are that important that they have their own section in the Management of Health and Safety at Work Regulations 1999. On the other hand **failing to comply with these regulations has serious consequences** for both organisations and individuals. That's why we made this course.

This course has 1 hours of study time required.

This course is typically completed within 1 day.

You have access to this diploma for 6 months from the date of enrolment.

The Risk Assessment Awareness Course is suitable for those looking to gain a good insight into risk assessments regardless of prior experience and knowledge.

www.SHEilds.org

The Risk Assessment Awareness course has been designed as a short, 60-minute course that teaches the understanding of why we carry out risk assessments as well as the five steps to risk assessment. It explains in depth what risks and hazards are and shows how level of risk is calculated.

This course goes on to show practical examples of how to control risks using the IOS45001 approach to the hierarchy of control and is **packed full of case studies based on real life scenarios and interactive activities to reinforce learning.**

At SHEilds we noticed people were interested in risk assessments. So, **we created this course to help upskill employees and to reduce health and safety incidents in the workplace.**

Within this course, we provide an insight into risk assessments. We also provide a certificate of completion when you have passed.
