**SHEilds** Risk Assessment Awareness Course

# **SHEILDS QUALIFICATIONS**

# DISPLAY SCREEN EQUIPMENT AWARENESS COURSE

This is a complete Display Screen Equipment course and **upon completion you get a certificate to prove your competence.** Many people come to us asking for NEBOSH, IOSH and NVQ courses but are unsure what to expect. This course can serve as an intro for some of our other courses.

This course has 1 hour of study time required.

This course is typically completed within 1 day.

6

You have access to this course for 6 months from the date of enrolment.

This Display Screen Equipment Awareness course is suitable for anyone that must interact with computers at work, or sit for long periods of time.

[www.SHEilds.org](http://www.SHEilds.org)

The Display Screen Equipment Awareness course has been designed as a short course used to assess a users workstation and minimise the risk of injuries. There are many areas to cover, however **this course makes it simple and manageable for users of all levels.**

This DSE course explains the correct use of Display Screen Equipment for workstations. This course teaches you how to correctly evaluate your workstation and how to perform and prepare a Risk Assessment based on your personal DSE circumstances.

# SHE ilds

View  
Qualification

At SHEilds we noticed that people are searching for DSE and workstation assessments. So, we created this course as it has been identified that **DSE assessments are one of the most important aspects of health and safety**, as it affects the largest group in a modern workforce.

With this online course, we provide DSE Self-Assessment training, a DSE Risk Assessment Document and a certificate of completion when you have passed.

# MANUAL HANDLING AWARENESS COURSE

At SHEilds, we understand that Manual Handling can be over looked, applying Health and Safety to tasks such as lifting may seem unnecessary. Many problems often go unreported to Health and Safety Offices as **many people are unaware of the severe risks of doing these tasks regularly.**

This course has 1 hour of study time required.

This course is typically completed within 1 day.

6

You have access to this diploma for 6 months from the date of enrolment.

This Manual Handling Awareness course is suitable for those who work in labour intensive jobs or those who have to lift heavy objects regularly within their workplace.

The Manual Handling Awareness Course has been designed as a short course used to educate on proper lifting techniques. There are many areas to cover, however **this course makes it simple and manageable for users of all levels.**

This course explains the correct use of lifting and handling techniques. In addition to the understanding of weight limits and the types of injuries that can occur.

Qualification

At SHEilds we noticed people are searching for Manual Handling Workplace Assessments. So, we created this course as it's been identified that **Manual Handling injuries are one of the most common injuries in health and safety.**

Within this online course, we provide manual handling training and awareness, and a certificate of completion when you have passed.

# RISK ASSESSMENT AWARENESS COURSE

At SHEilds, we understand how important Risk Assessments are. Risk Assessments are that important that they have their own section in the Management of Health and Safety at Work Regulations 1999. On the other hand **failing to comply with these regulations has serious consequences** for both organisations and individuals. That's why we made this course.

This course has 1 hours of study time required.

This course is typically completed within 1 day.

You have access to this diploma for 6 months from the date of enrolment.

The Risk Assessment Awareness Course is suitable for those looking to gain a good insight into risk assessments regardless of prior experience and knowledge.

[www.SHEilds.org](http://www.SHEilds.org)

The Risk Assessment Awareness course has been designed as a short, 60-minute course that teaches the understanding of why we carry out risk assessments as well as the five steps to risk assessment. It explains in depth what risks and hazards are and shows how level of risk is calculated.

This course goes on to show practical examples of how to control risks using the IOS45001 approach to the hierarchy of control and is **packed full of case studies based on real life scenarios and interactive activities to reinforce learning.**
